

CASE STUDY

Scaling Internal Funding & Measuring Impact at UNLV

INFOREADY USES

- Internal funding programs
- Limited submissions opportunities
- Faculty awards
- Strategic reporting

INFOREADY CLIENT

University of Nevada Las Vegas
 Division of Research
 Las Vegas, NV

INFOREADY ADMINISTRATOR

Althea Sheets, Associate Director of
 Research Engagement

THE CHALLENGE

At UNLV, the Division of Research manages multiple internal funding programs designed to support faculty innovation and advance strategic research initiatives.

But coordinating these programs required managing applications, reviews, notifications, and reporting across multiple tools. Tracking outcomes, such as publications, collaborations, and follow-on funding, was particularly difficult.

The research office needed a way to centralize program administration while also collecting the data needed to demonstrate the impact of its investments.

THE SOLUTION

UNLV implemented InfoReady to manage its internal funding programs from start to finish.

With InfoReady, the research office can now:

- Launch internal funding competitions quickly using reusable templates
- Collect applications and letters of intent through a centralized portal
- Manage peer reviews and selection decisions in one place
- Automate notifications and communication with applicants
- Collect progress reports to track long-term program impact

THE RESULTS

Using InfoReady has helped then team improve its ability to measure the success of internal funding initiatives.

Key benefits include:

- Faster setup and management of funding competitions
- Improved reporting on research outcomes and return on investment
- Reduced administrative burden for program staff
- Greater transparency for faculty applicants

“ We use it for internal faculty awards, seed grants, and limited submissions... We collect interim, final and three years of post award data in our seed grants.”
